

Pupil Progress Data Progression - Nursery

During the academic year 2017-18 we have 27 children eligible for EYPP.

Baseline entry data show that children enter well below National expectations. We benchmark against an average child entering at 22-36 months exceeding/30-50 months emerging. For a child to make expected progress across Kingsland C.E Academy they will need to enter Reception class at 30-50 exceeding/40-60 month emerging.

As a Nursery we are trying to narrow the gap between the National expectation on entry and exit as they go to the school.
